

**ISOPE-2016: Second ISOPE Symposium on
Materials Reliability in Refining & Petrochemical industries (MRRP)
*Final CALL FOR PAPERS***

**The 26th Annual International Ocean and Polar Engineering Conference
Rhodes, Greece, June 26 – July 2, 2016**

In response to the growing attention and emphasis on Asset Integrity in Refining and Petrochemical plants, we organized a successful symposium in at ISOPE 2015 in Hawaii. We are continuing the special symposium at ISOPE 2016 to focus on the various materials topics ranging from corrosion, high temperature failures, material degradation mechanism, life prediction etc. On behalf of the symposium organizing committee, we would like invite the leaders working in these areas to participate in the second special symposium on Materials Reliability in Refineries and Petrochemical plants (**MRRP**). The purpose of this symposium is to, among others, discuss and share the state-of-the-art knowledge in forensic analysis with the focus on fundamental damage and failure mechanisms, effective solutions to maintain a safe operating environment, component life prediction which are key ingredients to enhance the reliability of the plant.

Abstract deadline: December 20, 2015

Manuscript deadline for review: February 19, 2016

Suggested Technical Topics:

- **Failures Analysis & Trouble-shooting**
- **Material Selection & Corrosion Control**
- **Life prediction & Fitness for Service**
- **Non Destructive Testing & Evaluation**
