CONTENTS

VOLUME I

GLOBAL OFFSHORE ENERGY DEVELOPMENTS

DECOMMISSIONING OF OFFSHORE STRUCTURES: THE NORWEGIAN APPROACH
Olav Fjellsa ................................................................. 1

THE ENVIRONMENTAL AGE AND U.S. OFFSHORE OIL DEVELOPMENT
Peter Johnson and William Westermeyer ..................................................... 7

OFFSHORE HEAVY LIFT OPERATIONS

DEVELOPMENTS IN THE ANALYSIS OF OFFSHORE HEAVY LIFT OPERATIONS
J.J.M. Baar .................................................................................. 15

DYNAMIC ANALYSIS OF OFFSHORE HEAVY LIFTS
J. Hamilton and F. Ramzan ................................................................. 23

MODELLING THE DYNAMICS OF OFFSHORE JACKET LIFTS
K.C. Tong and P.E. Duncan ................................................................. 35

A STATISTICAL METHOD FOR EVALUATION OF HEAVY LIFT OPERATIONS OFFSHORE
Tor Vinje, Jens P. Kaalstad, and Dave W. Daniel ........................................ 43

A STUDY ON THE INFLUENCE OF THE RIGGING CONFIGURATION
THE INSTALLATION OF A LIFTED JACKET
J.A. Hollowell, R.W. Robinson, W.D. Hartell, and R.E. Ricketts .................................................. 52

TLP

MODEL TESTING OF TENSION LEG PLATFORMS - PART I: SIMULATION OF ENVIRONMENTAL LOADING
M.B. Irani, O.G. Nwogu, and G.R. Mogridge ................................................................. 61

MODEL TESTING OF TENSION LEG PLATFORMS - PART II: EXPERIMENTAL HARDWARE AND DATA ANALYSIS
M.B. Irani, G.R. Mogridge, and E.R. Funke ................................................................. 71

EARTHQUAKE RESPONSE OF THE TENSION LEG PLATFORM UNDER OFFSET CONDITION
Toshimasa Kawanishi, Takashi Kato, Hiroaki Takamura, and Hiroshi Kobayashi ......................... 80

QUANTIFICATION OF NONLINEAR ENERGY TRANSFER TO SUM AND DIFFERENCE FREQUENCY RESPONSES OF TLP'S
S.B. Kim, E.J. Powers, R.W. Miksad, and F.J. Fischer .................................................... 87

SUM-FREQUENCY EXCITATIONS IN TLP DESIGN
Birger J. Natvig and Horst Vogel ................................................................. 93

TIME DOMAIN SIMULATION OF THE DYNAMIC BEHAVIOUR OF A TENSION LEG PLATFORM
D.Th. Armenis, T.A. Angelopoulos, and D.G. Papanikas .................................................... 100

RELIABILITY ANALYSIS OF TENSION LEG PLATFORMS BY DOMAIN CROSSING APPROACH
Woo-Sun Park, Chung-Bang Yun, and Byung-Kun Yu .................................................... 108

FIXED AND JACK-UP STRUCTURES

SELECTION OF DESIGN SEA STATES FOR JACK-UP PLATFORMS WITH DYNAMIC BEHAVIOUR
Daniel Karunakaran, Nils Spidsoe, and Ove T. Gudmestad ............................................. 117

RESPONSE ANALYSIS OF JACK-UP PLATFORMS
O. Mo, I. Lotsberg, and R. Loseth ................................................................. 128

DESIGN METHOD OF LEG STRUCTURE OF JACK-UP RIGS
T. Ohta, H. Yamauchi, and M. Toriumi ................................................................. 138

MARINE GROWTH ON OFFSHORE STRUCTURES IN INDIAN OFFSHORE WATERS AND REMOVAL STRATEGY
Sankalpa Mitra ................................................................. 143

</tbody>
</table>
JOINT ENVIRONMENTAL MODEL FOR RELIABILITY CALCULATIONS
Elzbieta M. Bitner-Gregersen and Sverre Haver .................................................................246

NEW METHODS FOR STRUCTURAL RELIABILITY ASSESSMENT
Robert E. Melchers ..................................................................................................................254

RELIABILITY OF REINFORCED CONCRETE COLUMNS AND SHAFTS
M.F. Petrou and C.G. Trezos ..................................................................................................259

APPLICATION OF RELIABILITY ANALYSIS IN OFFSHORE STRUCTURES

RELIABILITY ANALYSIS OF A DIVERLESS MANIFOLD IN A BRAZILIAN PETROLEUM FIELD
Denise Faertes, Luis Fernando S. Oliveira, Pedro P. de Lima, and Silva Garcia ........................272

ESTIMATION OF FUZZY RELIABILITY FOR OFFSHORE STRUCTURES
Chen Guoming and Fang Huacan ..........................................................................................277

SUBSEA SYSTEMS

MOTION RESPONSE OF A CATENARY ANCHORED, FLOATING LOADING BUOY. RECLASSIFICATION OF THE STATFJORD B SPM
P. Teigen and T. Torsoy .........................................................................................................284

SAFETY AND COST EFFECTIVE DESIGN OF SUBSEA INSTALLATIONS
Stein Haugen and Jan Erik Vinnem ......................................................................................292

THE ALTERNATIVES TO DIVER INTERVENTION WITH RESPECT TO SUBSEA HYDROCARBON PRODUCTION SYSTEMS
D. Lilley and D. Rankin ........................................................................................................298

FLOATING PRODUCTION AND MARGINAL FIELDS

PRELIMINARY DESIGN OF SEMI-SUBMERSIBLE PLATFORM FOR FLOATING PRODUCTION SYSTEM USING OPTIMIZATION'S TECHNIQUES
J.M.A. Vasconcellos and Dracos Vassalos .............................................................................304

PERFORMANCE OF TURRET-MOORED FPSO SYSTEMS IN WAVES
Tom O'Donoghue and Brian T. Linfoot ..................................................................................311

GAS LIFT - A BETTER ALTERNATIVE FOR MARGINAL FIELDS OF INDIAN OFFSHORE
Kishore Kahali, Ramashish Rai, and R.K. Mukerjie ............................................................317

LONG DISTANCE WELL FLUID TRANSPORTATION - A FEASIBLE ALTERNATIVE FOR DEVELOPMENT OF MARGINAL FIELDS OF INDIAN OFFSHORE

CONTENTS

VOLUME II

COMPUTER TECHNOLOGY

VISUAL DESIGN VERIFICATION OF SCULPTURED OBJECTS
Bradley A. Moran and Werner Hansmann ................................................................. 1

SOLVING THE INTERSECTION LINES OF MECHANICAL PARTS BY CL FORMULA
Kang-le Shen, ShuDuan Guo, and XueBin Liang .................................................. 8

LOCALIZATION FOR AUTOMATED INSPECTION OF CURVED SURFACES
Leonidas Bardis, Richard A. Jinkerson, and Nicholas M. Patrikalakis ...................... 16

DESIGN OF AN OBJECT-ORIENTED STRUCTURAL ANALYSIS PROGRAM
Sanjay S. Jaiswal and H. Ronald Riggs ................................................................. 25

CASCADED OPTIMIZATION OF THE DYNAMICS OF AN INDUSTRIAL ROBOT ELECTRIC
DRIVE AS A MULTIPARAMETRIC ELASTIC ENTITY
V.L. Kudriavtsev and V.I. Poleschuk ................................................................. 33

GRAFX AS A TOOL IN OCEAN ENGINEERING SYSTEM DESIGNS
Jerzy K. Soldek and Wlodzimierz Rucinski ......................................................... 38

ROV AND CONTROL

ROV90 - A PROTOTYPE AUTONOMOUS INSPECTION VEHICLE
Ornulf Jan Rodseth and Jan Olav Hallset ................................................................. 42

**PROGRAMME AND MAJOR DESIGN METHODS TO DEVELOP SUBSEA ROVs**
Ye. Ivanov, S. Karev, and A. Finkelshteyn ................................................................. 48

**DESIGN OF A NEW HIGH PERFORMANCE VS POSITION CONTROL OF ROVs**
J.P.V.S. da Cunha, R.R. Costa, L. Hsu, and R.B. Dominguez ........................................ 53

**ERGONOMIC ASPECTS OF UNDERWATER TOOLS USED BY DIVERS**
K. Piotrowski ............................................................................................................. 61

**TRAJECTORY TRACKING CONTROL OF A ROV FOR LIFTING OBJECTS**
Hideyuki Suzuki and Koichiro Yoshida ........................................................................ 66

**MOTION SIMULATION OF SUBSEA VEHICLES**
S. Kalske and K. Happonen .......................................................................................... 74

**UNDERWATER TOWED VEHICLE MANEUVERABLE IN BOTH VERTICAL AND HORIZONTAL AXIS**
N. Kato ......................................................................................................................... 85

**DISTURBANCE CHARACTERISTICS AND CONTROL STRATEGY IN MARINE ENVIRONMENTS**
Y. Okano ....................................................................................................................... 93

**IDENTIFICATION OF LOW-ORDER DYNAMIC MODELS FOR DEEPLY-TOWED UNDERWATER VEHICLE SYSTEMS**
Franz S. Hover and Dana R. Yoerger ........................................................................... 97

**THE HYDRODYNAMICS OF ROVs CARRYING WORK PACKAGES**
P. Sayer and C.A. Miller .............................................................................................. 106

**EFFECT OF MOORING SYSTEM ON LOW FREQUENCY MOTIONS OF A DRILLING SHIP**
Tadeusz Szefangiewicz ................................................................................................. 115

**ON THE NUTATION DAMPING OF FLUID-STRUCTURE INTERACTION INSTABILITIES**
V.J. Modi and F. Welt ..................................................................................................... 123

**RISERS**

**INFLUENCE OF AMPLITUDE MODULATION ON THE FLUID FORCES ACTING ON A VIBRATING CYLINDER IN CROSS-FLOW**
R. Gopalkrishnan, M.S. Triantafyllou, and M.A. Grosenbaugh ..................................... 132

**A DESIGN METHOD FOR MULTIPLE FLEXIBLE RISER SYSTEMS**
K. Ishii, T. Fuku, T. Yamaguchi, and R. Hidaka ......................................................... 140

**PARAMETRIC STUDIES OF FLEXIBLE RISERS**
F.B. Seyed and M.H. Patel .......................................................................................................................... 147

A MATRIX APPROACH TO THE ANALYSIS OF LOAD AND STRESS DISTRIBUTION IN THREADED CONNECTIONS
H. Bahai and I.I. Esat ................................................................................................................................. 157

OPTIMAL ARRANGEMENT OF 6+1 SATELLITE RISER IN A CURRENT
S.P. Johnson and M.M. Zdravkovich .......................................................................................................... 164

THREE DIMENSIONAL ANALYSIS OF A MARINE RISER WITH LARGE DISPLACEMENTS
Tseng Huang and Qing Liang Kang ........................................................................................................... 170

LANCZOS-RITZ MODAL DYNAMIC ANALYSIS OF MARINE RIGID RISERS
G.B. Ellwanger, E.P. Lima, M.Q. Siqueira, and H. Casaprima .................................................................. 178

DESIGN CONSIDERATIONS FOR TLP RISERS IN HARSH ENVIRONMENTS
F.K. Lim and S. Hatton .............................................................................................................................. 182

THE EFFECTS OF VIBRATION ABSORBERS ON THE LONGITUDINAL VIBRATION OF A PIPE STRING IN THE DEEP SEA
K. Aso, K. Kan, H. Doki, and K. Iwato ....................................................................................................... 190

AXIAL DYNAMICS OF DEEP WATER RISERS
A.D. Trim .................................................................................................................................................. 198

MOORING AND CABLES

NUMERICAL ANALYSIS OF 2-D NONLINEAR CABLE EQUATIONS WITH APPLICATIONS TO LOW-TENSION PROBLEMS
Christopher T. Howell ............................................................................................................................. 203

PLANAR AND NON-PLANAR RESPONSE OF A SUSPENDED CABLE DRIVEN BY SMALL SUPPORT OSCILLATIONS
N.C. Perkins ............................................................................................................................................... 210

ANALYSIS OF EXTREME TENSIONS IN A SNAPPING CABLE
H. Shin .................................................................................................................................................... 216

MODELING OF UNDERSEA CABLE INSTALLATION WITH A FINITE DIFFERENCE METHOD
J.J. Burgess ................................................................................................................................................ 222

POWER CABLES AND UMBILICALS - CONDUCTOR STRAIN UNDER PURE BENDING
G. Feld, R.L. Reuben, D.G. Owen, and A.E. Crockett ............................................................................... 228

COMPARATIVE STUDY ON THE QUASI-STATIC ANALYSES AND DYNAMIC SIMULATIONS FOR ESTIMATING THE MAXIMUM TENSIONS OF MOORING LINES
Yoshiyuki Inoue, Hiroaki Miyabe, Xue Weiyi, and Mauricio Nakamura ...................................................... 236
EXPERIMENTAL AND NUMERICAL STUDY ON THE EFFECT OF BUOYS ON DEEP WATER MOORING DYNAMICS
S.A. Mavrakos, V.J. Papazoglou, M.S. Triantafyllou, and P. Brando .............................................. 243

ELASTIC STATIC ANALYSIS OF CHAIN LINKS IN TENSION AND BENDING
V.J. Papazoglou, G.M. Katsaounis, and J.D. Papaioannou ................................................................. 252

DESIGN NOTES ON SPREAD MOORING SYSTEMS
Bohdan W. Oppenheim and James E. Fletter ................................................................. 259

EXPERIMENTAL STUDY ON THE BEHAVIOUR OF A TWO TENSION LEG BUOY MOORING SYSTEM IN WIND, WAVE AND CURRENT
Qi Xin-yuan, Xie Nan, Cheng Tian-yang, and Qi Tao ................................................................. 266

PIPELINES

TRAWL FORCES ON FREE-SPANNING PIPELINES

STATIC CALCULATION OF PIPELINE FREE SPANS. A SIMPLE AND QUICK METHOD
Egil Skomedal ..................................................................................................................................... 281

ONSET OF SCOUR BELOW A PIPELINE EXPOSED TO WAVES
B.M. Sumer and J. Fredsoe ............................................................................................................. 290

LOCAL SCOUR CONTROL UNDER WAVES AND CURRENTS COMBINED
Yoshiaki Kawata and Yoshito Tsuchiya ......................................................................................... 296

TIME SCALE FOR WAVE/CURRENT SCOUR BELOW PIPELINES
J. Fredsoe, B.M. Sumer, and M.M. Arnskov .................................................................................... 301

SELF BURIAL AND STIMULATED SELF BURIAL OF PIPELINES BY WAVES
K. Tunc Gokce and A. Riza Gunbak ............................................................................................... 308

TRANSPORTATION OF WAXY CRUDE THROUGH PIPELINE SYSTEMS: ANALYSIS OF SOME CRITICAL DESIGN PARAMETERS
B. Sarkar and A. Bhattacharya ........................................................................................................ 315

EFFECT OF THERMAL ENVIRONMENT ON WAX DEPOSITION IN A CRUDE OIL PIPELINE: ANALYSIS OF SOME CRITICAL ASPECTS
A. Bhattacharya .............................................................................................................................. 322

ELECTRIC HEAT TRACING OF SUBMARINE PIPELINES INDUCTION HEATING BY THE STATOIL INVENTED "ITTI"-SYSTEM
C.H. Ahlen ........................................................................................................................................ 331

DESIGN, CONSTRUCTION AND COMMISSIONING OF HEERA-URAN TRUNKLINE
PROJECT
S. Jayachandran and Shiv Anand ................................................................. 335

ENGINEERING FOR ROUTING AND COMPREHENSIVE DESIGN OF SUBMARINE PIPELINE AND RISER AT EXISTING PLATFORM COMPLEX
Sarasij Majumder, Sucharit Markanday, and Shiv Anand .................................................. 347

UNDERWATER PIPELINE SYSTEM CONSTRUCTION ACROSS THE BAYDARATSKAYA BAY IN THE KARA SEA
Mikhail A. Kamyshev and Sh.R. Kudashev ................................................................. 354

METHODS FOR PROBABILISTIC ASSESSMENT OF ENVIRONMENTAL HAZARDS TO SUBMARINE PIPELINES
Guoyang Jiao and Roberto Bruschi ................................................................. 361

RISK ANALYSIS OF SUBSEA PIPELINES HAZARDS INDUCED BY HUMAN OFFSHORE ACTIVITIES
Roberto Carpaneto and Marco Tominez ................................................................. 372

SAFETY AND INTEGRITY OF SUBMARINE PIPELINES/FLOWLINES UNDER INTERACTION OF FISHING TRAWL DOORS
Guoyang Jiao, Bjorn Skallerud, and Torbjorn Sotberg .................................................. 378

INTEGRITY MONITORING AND MAINTENANCE CRITERIA FOR NEW AND EXISTING ON LAND AND MARINE PIPELINES
P.St.J. Price and H.A. Anderson ................................................................. 386

MATERIALS AND METHODS FOR PIPELINE CONSTRUCTION IN THE USSR
R.M. Shakirov and V.I. Khomenko ................................................................. 394

DEVELOPMENT OF A FATIGUE MODEL FOR PREDICTION OF FLEXIBLE PIPE LIFE EXPECTANCY
Z. Chen, R.L. Reuben, and D.G. Owen ................................................................. 400

FIBRE REINFORCED FLEXIBLE PIPE MATERIAL SELECTION AND DESIGN METHODS
Svein Are Lotveit and Hakon Ward ................................................................. 414

STRESS CONCENTRATIONS IN PIPELINES DUE TO THE PRESENCE OF DENTS
M. Beller, C. Mattheck, and J. Zimmermann ................................................................. 421

INTERNATIONAL POLAR RESEARCH

THE FINNISH ARCTIC OFFSHORE RESEARCH PROGRAMME
Ernst Enkvist and Esa Eranti ................................................................. 425

THE DEVELOPMENT OF AUSTRALIAN ANTARCTIC BUILDING TYPES
Phil Incoll ................................................................. 434
MODELLING OF SNOWDRIFT AROUND PRISMATIC BUILDINGS FOR ANTARCTIC ENVIRONMENT
D.H. Kim, K.C.S. Kwok, D.J. Smedley, and H.F. Rohde ................................................................. 443

ICE, STRUCTURES AND SCOUR

REMOTE SENSING OF ICEBERGS IN THE BARENTS SEA DURING SIZEX 89
Stein Sandven, Kjell Kloster, and Ola M. Johannessen ............................................................... 451

BEAUFORT SEA ICE THICKNESS MEASUREMENTS FROM AN ACOUSTIC, UNDER ICE, UPWARD LOOKING ICE KEEL PROFILER
G. Roger Pilkington and B.D. Wright ........................................................... 456

STAMUKHI ON THE NORTHERN SAKHALIN OFFSHORE
V.N. Astafiev, A.M. Polomoshnov, and P.A. Truskov ................................................................. 462

SCOUR DEPTHS DISTRIBUTION ON THE NORTHERN SAKHALIN OFFSHORE
P.A. Truskov and G.A. Surkov ........................................................... 467

LONG RANGE DETECTION OF ICEBERGS USING GROUND WAVE RADAR
S.K. Srivastava and A.M. Ponsford ........................................................... 471

INVESTIGATION OF FLOATING PLATE STABILITY BY THE BOUNDARY ELEMENT METHOD
A.A. Ushakov, N.G. Khrapaty, and V.A. Takhteyev ................................................................. 477

DYNAMICAL PROBLEMS OF ICE COVER FRACTURE
A.V. Pushkin, L.I. Slepian, and A.N. Zlatin ........................................................... 481

GENERAL THEORY OF DYNAMIC ICE STRUCTURE INTERACTION WITH APPLICATIONS
Esa Eranti ........................................................... 489

MEASUREMENT OF ICE FORCES ON LIGHT PIERS IN THE ST. LAWRENCE SEAWAY
R. Frederking, M. Sayed, and G. Penney ........................................................... 499

LOCAL SCOUR DEPTH OF SAND BOTTOM AROUND GRAVITATIONAL ICE-RESISTANT STRUCTURES CAUSED BY WAVES
I.Sh. Khalfin ........................................................... 505

WAVE DEFORMATIONS OF SEA ICE FLOES IN THE ANTARCTIC DUE TO STORMS AND ICEBERGS
V.N. Smirnov ........................................................... 510

NEW ASPECTS OF ICE/STRUCTURE INTERACTION PROBLEMS
Yu.N. Alekseev, V.A. Belijashov, K.E. Sazonov, and O.M. Starovoitov ........................................... 515

SUBMUDLINE PRODUCTION SYSTEMS AS A SOLUTION TO ICEBERG HAZARDS
W.G. Edwards and D.S. Dallimer ........................................................... 520
A COMPARISON OF THE ATMOSPHERIC ICING ON TWO DIFFERENT SIZE CABLES
Jacques Druez and Pierre McComber ................................................................. 528

PREDICTING CREEP DISPLACEMENTS OF LATERALLY LOADED PILES IN ICE
AND ICE-RICH MATERIALS

INVESTIGATION OF SEA SPRAY ICING ON OFFSHORE STRUCTURE
Yuzo Mizuno, Mitsunari Hirasawa, Kenji Yano, and Kazuo Tokikawa .................. 543

BEHAVIOUR OF STEEL-CONCRETE COMPOSITE MEMBERS FOR ARCTIC
OFFSHORE STRUCTURES
S.S. Gowda and P. Hassinen ................................................................. 548

ON THE MECHANISM OF SHIP HULL DENTS CAUSED BY ICE PRESSURE
K. Tamura and M. Arita ................................................................. 556

ICE LOADING ON OPEN AND DUCTED PROPELLERS
Robin P. Browne, Arno Keinonen, and Pierre Semery ................................. 562

ICE-RESISTANT ENAMELS FOR ICE-BREAKERS AND OFFSHORE STRUCTURES
M.G. Gladkov, I.P. Moiseeva, and L.G. Sidorova ...................................... 571

METAL MINING IN POLAR REGIONS
David Lyons ................................................................. 574

VOLUME III, 1991

Waves, Ocean Measurements, Hydrodynamic Forces, Vortex and Oscillations
Motions and Nonlinear Dynamics, Higher-order Effects

For set of 4 volumes; 2,190 pp.

CONTENTS

VOLUME III

WAVES

EFFECTS OF THREE-DIMENSIONALITY ON WAVE KINEMATICS AND LOADING
K. She, C.A. Greated, and W.J. Easson ............................................................... 1

PERFECT OCEAN WAVE FOCUSING WITHOUT REFLECTION
Sunao Murashige, Takeshi Kinoshita, and Tatsuo Suzuki ............................... 6

RANDOM WAVE SIMULATION BY DIGITAL FILTERING USING AN INDUSTRY-STANDARD PARALLEL COMPUTING FACILITY
E. Yarimer and C. Solomonidis ................................................................. 15

NUMERICAL SIMULATION OF MULTI-DIRECTIONAL RANDOM SEAS
Yu-xiu Yu, Shu-xue Liu, and Li Li ................................................................. 26

NUMERICAL SIMULATION OF SOLITARY WAVE DIFFRACTION IN SHALLOW WATER
Jianguo Lin and Yulin Lu ................................................................. 33

BREAKING WAVES IN DEEP-WATER RANDOM SEAS

STATISTICAL PROPERTIES OF WAVE FRONTS IN DIRECTIONAL SEAS
L. Rebaudengo Lando, G. Scarsi, and A.C. Taramasso ........................................ 47

FIELD TRIALS OF THE DIRECTIONAL WAVERIDER
Stephen F. Barstow and Tor Kollstad ............................................................. 55
A NEW MODEL FOR THE KINEMATICS OF LARGE OCEAN WAVES - APPLICATION AS A DESIGN WAVE
Peter S. Tromans, Ali R. Anaturk, and Paul Hagemeijer ................................................................. 64

THE COMPARISON OF WAVE DATA OF VARIOUS AREAS IN NORTH PACIFIC OCEAN USING WAVE DATA INDEX
Y. Hattori, I. Nakamura, and Y. Kawai ................................................................................................... 72

DOUBLE-PEAKED WAVE SPECTRA MODELLING: A CASE STUDY IN THE PORTUGUESE COAST
A.A. Pires Silva and A.J.N.A. Sarmento ............................................................................................... 76

COMPARISON OF WIND SPEEDS OVER ARABIAN SEA AND BAY OF BENGALEM DERIVED FROM GEOSAT ALTIMETER DATA
Usha Natesan and S.P. Subramanian .................................................................................................. 83

GENERATION OF SHORT CRESTED SEAS IN LABORATORY WAVE TANKS
I.G. Bryden and B.T. Linfoot ................................................................................................................ 89

CREST KINEMATICS IN WAVE GROUPS
J. Sutherland, C.A. Greated, and W.J. Easson ................................................................................ 97

WAVE DISSIPATING CAPACITY OF MULTI-SLOTTED-WALLS BREAKWATER
Kazuhiro Hagiwara and Toru Sawaragi ............................................................................................. 104

OCEAN MEASUREMENTS

THE ROLE OF OCEAN ENGINEERS IN JAPANESE OCEAN MEASUREMENT RESEARCH
Wataru Koterayama .......................................................................................................................... 112

NETWORKS FOR OFFSHORE INSTRUMENTATION
Keith Witney ........................................................................................................................................ 120

HYDRODYNAMIC FORCES

TOWARDS AN IMPROVED WAVE FORCE EQUATION

DECOMPOSITION OF LOW FREQUENCY HYDRODYNAMIC FORCES ACTING ON A FLOATING VESSEL MOORED IN OCEAN WAVES
Takeshi Kinoshita ................................................................................................................................... 135

THREE DIMENSIONAL EFFECTS ON HYDRODYNAMIC FORCES ACTING ON AN OSCILLATING FINITE-LENGTH CIRCULAR CYLINDER
M. Nakamura, W. Koterayama, and K. Hoshino ............................................................................... 143

22
FORCE COEFFICIENT ESTIMATION FROM RANDOM WAVE DATA
Michael Isaacson, Kesavan Subbiah, and John Baldwin ................................................................. 149

HYDRODYNAMIC FORCES ON A HORIZONTAL CYLINDER RESTING ON A SAND BED
UNDER WAVES AND CURRENTS
Peter Stansby and Paul Starr ........................................................................................................ 158

PROXIMITY EFFECTS OF BOTTOM AND FREE SURFACE BOUNDARIES TO
WAVE FORCES ACTING ON A SUBMERGED SPHERE
Koichiro Iwata and Norimi Mizutani ............................................................................................ 164

ON A HYDRO-ELASTIC PROBLEM IN OFFSHORE STRUCTURES: THE FORCES
ON AN OSCILLATING CYLINDER REVISITED
A. Otter ......................................................................................................................................... 172

HYDRODYNAMIC FORCES ACTING ON A HORIZONTAL CIRCULAR CYLINDER WITH
AN INCLINED ANGLE TO THE WAVE CREST IN REGULAR WAVES
Koji Otsuka and Yoshiho Ikeda .................................................................................................. 178

EFFECTS OF FREE SURFACE FLUCTUATION ON RESPONSE OF OFFSHORE STRUCTURES
Chi C. Tung and Cheng H. Yang .................................................................................................. 183

HYDRODYNAMIC FORCE CHARACTERISTICS IN THE SPLASH ZONE
Nicholas Haritos .......................................................................................................................... 194

WAVE IMPACT LOADS ON HORIZONTAL STRUCTURES IN THE SPLASH ZONE
E.S. Chan, H.F. Cheong, and K.Y.H. Gin .................................................................................... 203

HYDRODYNAMIC FORCES ACTING ON INCLINED CYLINDER DUE TO WAVES
WITH CROSSING CURRENT
Yu-Cheng Li, Hai-Gui Kang, and Da-Peng Sun ............................................................................ 210

WAVE FORCE COEFFICIENTS FOR INCLINED ROUGH CYLINDERS
S. Ghoshal, M.C. Deo, and S. Narasimhan .................................................................................. 220

FLOW AROUND MULTIPLE CYLINDERS BY THE RANDOM VORTEX METHOD
Peter Stansby and Arezki Slaouti ................................................................................................. 228

NEAR-FIELD INTERACTION BETWEEN TWO BODIES MOVING IN A FLUID
Allen T. Chwang and Zhi Guo ..................................................................................................... 236

STEEP WAVE FORCES ON GROUP OF VERTICAL CYLINDERS LOCATED IN
ANY WATER DEPTH
Song Ren Wu and Wen Xiao ........................................................................................................ 244

INTERACTION OF LARGE SQUARE CAISSONS IN RANDOM WAVES
Yongxue Wang ............................................................................................................................ 252

FLUID LOADING ON RECTANGULAR CYLINDERS IN STEADY FLOW
D. Hamel-Derouich ................................................................. 258

HYDRODYNAMIC CHARACTERISTICS AND SEISMIC ANALYSIS OF OFFSHORE CYLINDRICAL STRUCTURE-FLUID-SOIL SYSTEMS
J.J. Bi, H. Zhuang, and X.L. Weng .................................................. 264

DESIGN RESPONSE SPECTRA FOR OFFSHORE STRUCTURES
Sau-Lon James Hu and James Michael Mandato ................................ 270

THE ANALYSIS OF COMBINED ENVIRONMENTAL EXTREMES FOR OFFSHORE STRUCTURES
M. Nessim, D. Attwood, and V. Swail ................................................ 278

DESIGN OF DIGITAL FILTERS FOR REAL-TIME COMPUTATION OF FORCE ON A FLOATING BODY
Arekar Vinod Manohar ................................................................. 283

NONLINEAR WAVE FORCE ON THE BOTTOM OF A CIRCULAR CYLINDER
D.H. Qiu and Z.C. Sun ................................................................. 288

A STUDY OF THE EFFECTS OF NON-LINEAR DRAG TERM ON RESPONSE OF OFFSHORE STRUCTURES
A.C. Phadke and C.S. Gurujee ....................................................... 293

VORTEX AND OSCILLATIONS

MEASUREMENTS IN THE NEAR WAKE OF A K-NODE IMMERSED IN A STEADY UNIDIRECTIONAL FLOW
A.G.L. Borthwick, J.R. Chaplin, R. Burrows, and G.M. Drossopoulus .................. 301

VORTEX FORMATION IN SURFACE OCEAN CURRENTS
George S. Triantafyllou ............................................................... 309

THREE-DIMENSIONAL SIMULATION OF FLOW PAST A SPHERE
A.G. Tomboulides, S.A. Orszag, and G.E. Karniadakis .......................... 316

BI-STABLE FLOW ASSOCIATED WITH TWO TANDEM UNEQUAL DIAMETER CYLINDERS
S.C. Luo .................................................................................. 326

THE UNSTEADY TURBULENT WAKE THEORY AND ITS APPLICATION TO THE PROBLEMS OF OSCILLATING BODIES
Koichiro Matsumoto .................................................................. 330

IN-LINE FORCES ON A CYLINDER PERFORMING LARGE AMPLITUDE OSCILLATION IN A STEADY CURRENT

DAMPING OF A VERTICAL CYLINDER OSCILLATING IN STILL WATER
APPLICATION OF A GENERAL PREDICTION METHOD FOR VORTEX INDUCED VIBRATIONS OF CATENARY RISERS
J. Fang and G.J. Lyons ................................................................. 354

THE EFFECT OF MARINE GROWTH ON VORTEX SHEDDING AND THE FATIGUE LIFE OF TUBULAR MEMBERS: RESULTS FROM A CASE STUDY
Julian Wolfram ................................................................. 362

MOTIONS AND NONLINEAR DYNAMICS

MODELLING THE RESPONSE OF FLEXIBLY MOUNTED CYLINDERS IN OSCILLATORY FLOW
A.W. Lipsett and I.D. Williamson ................................................................. 370

SWEPT SINE WAVE TESTING OF COMPLIANT BOTTOM-PIVOTED CYLINDERS
Nicholas Haritos ................................................................. 378

ANALYSIS OF NONLINEAR RESPONSE OF AN ARTICULATED TOWER
Oded Gottlieb, Solomon C.S. Yim, and Robert T. Hudspeth ................................................................. 384

STOCHASTIC RESPONSES OF ANCHORED FLEXIBLE FLOATING ISLANDS SUBJECTED TO WIND-WAVES AND SEAQUAKES
Takuji Hamamoto, Hiroshi Takahashi, and Yasuo Tanaka ................................................................. 391

THREE-DIMENSIONAL HYDROELASTIC RESPONSE OF A VERY LARGE FLOATING STRUCTURE
Dayun Wang, H. Ronald Riggs, and R. Cengiz Ertekin ................................................................. 399

PREDICTION OF VISCOUS ROLL DAMPING AND RESPONSE OF TRANSPORTATION BARGES IN WAVES
R.G. Standing ................................................................. 409

CHAOTIC AND STOCHASTIC DYNAMICS OF OFFSHORE EQUIPMENT
Solomon C.S. Yim and Huan Lin ................................................................. 420

A STOCHASTIC ANALYSIS OF THE ROLLING MOTION OF SHIPS IN IRREGULAR WAVES
S.H. Kwon and R.C. McGregor ................................................................. 428

HIGHER-ORDER EFFECTS

FULL-SCALE MEASURED AND PREDICTED LOW-FREQUENCY MOTIONS OF THE SEMI-SUBMERSIBLE SUPPORT VESSEL "UNCLE JOHN"
R.G. Standing, W.J. Brendling, and G.E. Jackson ................................................................. 434

A SIMPLE METHOD FOR ESTIMATION OF EXTREME VALUES OF

VOLUME IV

CONTENTS

STRUCTURAL MECHANICS AND ANALYSIS

BLOCK LANCZOS ALGORITHM FOR DYNAMIC ANALYSIS OF OFFSHORE STRUCTURES UNDER MULTILOAD PATTERNS
O.A. Marques and L. Landau ................................................................. 1

A PERTURBATION METHOD OF DIRECT SPECTRAL ANALYSIS FOR THE RANDOM RESPONSE OF OFFSHORE STRUCTURES
Zhao-chang Zheng and Bao-rong Cheng ....................................................... 8

A DESIGN STUDY OF A DISCRETE COLUMN INVOLVING HILL-TOP BIFURCATION
D.G. Karr and K.P. A'Hearn ........................................................................ 14

F.E.M. APPROACH TO THE DEFORMATION STUDY OF PIG CUPS
Raffaele Romagnoli and Riccardo Varvelli ..................................................... 22

DYNAMIC ELASTIC-PLASTIC ANALYSIS OF OFFSHORE FRAMED STRUCTURES BY PLASTIC NODE METHOD CONSIDERING STRAIN-HARDENING EFFECTS
Masahiko Fujikubo, Yong Bai, and Yukio Ueda ........................................... 26

REASSESSMENT OF OFFSHORE STEEL STRUCTURES: SHAKEDOWN AND CYCLIC NONLINEAR FEM ANALYSES
Oyvind Hellan, Bjorn Skallerud, Jorgen Amdahl, and Torgeir Moan ................... 34

LIFETIME EXTENSION OF EXISTING OFFSHORE STRUCTURES
TRANSIENT DEFORMATION OF VISCOELASTIC MEMBRANES
C. Jenkins and J.W. Leonard ................................................................. 49

STRENGTH OF INTERSECTIONS IN COMPOSITE SANDWICH VESSELS UNDER EXTERNAL PRESSURE
Y.S. Choo, M.R. Horne, and P. Montague .................................................. 53

SEMI-RIGID TUBULAR JOINTS APPLIED TO OFFSHORE STRUCTURES
R. Kohoutek and I. Hoshyari ................................................................. 61

THE FLEXIBILITY OF UNIPLANAR AND MULTIPLANAR JOINTS MADE OF CIRCULAR HOLLOW SECTIONS
A. Romeijn, R.S. Puthli, and J. Wardenier ................................................. 67

IDENTIFICATION OF STRUCTURAL DAMAGES IN FIXED OFFSHORE PLATFORMS
Ney Roitman, Ronaldo C. Batista, Carlos Magluta, Paula F. Viero, and Flavio M. Sarquis .................. 77

RANDOM DYNAMIC RESPONSE ANALYSIS OF OFFSHORE PLATFORM
Kenji Kawano, K. Venkataramana, Yoshikazu Yamada, and Takeshi Iida ......................... 84

THE ULTIMATE STRENGTH OF TUBULAR BEAM-COLUMNS WITH DAMAGED SECTION AND LARGE BENDING DAMAGE
X.L. Liu and C.S. Cai .................................................................................. 90

THE INFLUENCE OF PREBUCKLING DEFORMATIONS AND STRESSES ON THE BUCKLING OF SPHERICAL SHELL
Luo Pei-lin, Luo Hong-wu, and Tong Fu-shang ............................................... 97

THE INELASTIC LARGE-DEFLECTION BEHAVIOUR OF PATCH-LOADED STIFFENED PLATES
E.P. Vassilikos and P.J. Dowling .............................................................. 105

BEHAVIOUR OF ANISOTROPIC SKEW PLATES UNDER UNIFORM DISTRIBUTED LOAD
M.M. Kamel, G. Sherif, and M. Kotb .......................................................... 113

DEFORMATIONS OF THIN-WALL CYLINDRICAL SHELLS OF OFFSHORE STRUCTURES
V.I. Seliverstov, A.T. Bekker, and N.G. Khrapaty ......................................... 121

PRESTRESS ENHANCEMENT OF GROUTED PILE/SLEEVE CONNECTIONS
Paul Grundy and James Foo Ee Kiu .......................................................... 130

THE EFFECT OF a/W RATIO AND CRACK SHAPE ON J, AND δj VALUES IN A SHIP PLATE STEEL
Qingfen Li, Dongyan Shi, Jiaquan Wei, and Boming Zhong .............................. 137

ELASTIC-PLASTIC ANALYSIS OF FABRICATED TUBULAR BEAM-COLUMN
XiaoMing Yang, ShaoFu Li, and GuoZhou Wang ....................................... 143
IMPACT AND EXPLOSION

EFFECT OF FLUID FORCE ACTING ON THE COLLIDING BODY UPON THE ELASTIC-PLASTIC RESPONSE OF AN OFFSHORE STRUCTURE
Yukio Ueda, Hidekazu Murakawa, and Dianxiang Xiang ................................................................. 148

RESPONSE OF STRUCTURES TO IMPULSE AND IMPACT LOADING II
K. Kormi and D.A. Duddell .................................................................................................................... 156

DYNAMIC RESPONSE OF SUBMERGED PLATES IMPACTED BY DRILL-COLLARS
W.M. Chen ........................................................................................................................................... 165

IMPACT DAMAGE OF LONG PLASTIC CYLINDERS
Michelle S. Hoo Fatt and Tomasz Wierzbicki ................................................................................ 172

DESIGN AGAINST EXPLOSION LOADS IN OFFSHORE STRUCTURES
J. Xu and R.H. Kirkvik ......................................................................................................................... 183

MATERIALS

RECENT TRENDS IN THE DEVELOPMENT OF OFFSHORE STEELS
D. Uwer and J. Degenkolbe .................................................................................................................. 190

NEW STEELS FOR BUILDING TOMORROW'S OFFSHORE STRUCTURES
Jean de la Hamette, Fernand Becker, Romain Henrion, and Roger Schlim ........................................... 200

QUENCHED AND TEMPERED PLATES IN THE RANGE 420/550 N/MM
G. Lefebvre and J-J. Dufrane ............................................................................................................. 206

A STUDY ON THE METALLURGICAL AND MECHANICAL PROPERTIES OF Al, Cu, STEEL, STAINLESS STEEL EXPLOSIVE CLAD JOINTS
Jung-Gi Moon, Dae-Hun Kim, Sun-Hyo Hwang, and Hyun-Jun Lee .................................................. 219

PRODUCTION AND WELDING OF ZERON 100 SUPER DUPLEX
G. Lefebvre and J-J. Dufrane ................................................................................................................ 224

FERRITIC-AUSTENITIC DUPLEX STAINLESS STEELS WITH IMPROVED MATERIAL AND WORKING PROPERTIES
Ralf Dohnke, Christoph Gillessen, Thomas Ladwein, and Ulrich Reichel ........................................... 233

CORROSION PERFORMANCE OF CLADDED STEELS AND STAINLESS STEELS
V.S.R. Murty, P.F. Anto, P.K. Pant, and R.D. Angal ........................................................................... 238

IMPROVED LOCAL CORROSION RESISTANCE OF WELDS OF Y.P. 350 N/mm CLASS STEELS FOR USE IN ICY SEAS
Y. Kumakura, N. Katayama, T. Inoue, Y. Horii, and T. Tsuzuki ............................................................ 245
APPROACHING A HOLE UNDER MIXED MODE LOADING
K. Germerdonk, M. Beller, and C. Mattheck .................................................................253

THE MECHANICS OF SOCKETING: THE ZINC ALLOY CAST CONE AS A SPECIAL
COMPOUND STRUCTURE
K. Gabriel and F. Helmes .................................................................................................257

APPLICATION OF ALUMINUM TO OFFSHORE TOPSIDE STRUCTURES
Michael J. Bayley ............................................................................................................265

CATHODIC PROTECTION OF TUBULAR JOINTS: A REAPPRAISAL OF THE EVIDENCE
I.S. Cole and O. Vittori ........................................................................................................273

TIME DEPENDENT EFFECTS IN CATHODIC PROTECTION SYSTEMS USING
BOUNDARY ELEMENTS
J.A.F. Santiago, W.J. Mansur, and J.C.F. Telles ..............................................................280

THE EFFECT OF SEA-WATER ON THE FATIGUE LIVES OF WELDED PLATES:
A COMPARISON OF RESULTS FROM UK AND OTHER NATIONAL PROGRAMMES
T.R. Gurney and J.V. Sharp .................................................................................................288

PROBABILISTIC FATIGUE AND CORROSION FATIGUE ANALYSIS OF FRAME TO
HULL JOINTS
J.W. Tichler and T.N. Bosman ...........................................................................................297

WELDING

WELD PROPERTY RESEARCH OF LARGE-DIAMETER HIGH STRENGTH PIPES
PERFORMED BY FLASH-BUTT WELDING
V.I. Khomenko, O.S. Papkov, I.A. Drugova, and A.S. Zandberg ........................................304

HEAT FLOW IN ARGON TUNGSTEN ARCS AND WORKPIECE THERMAL RESPONSE
AT PRESSURES UP TO 6 MPA
H. Fulfs and A. Katsaounis ...............................................................................................311

EFFECT OF AMBIENT PRESSURE ON EROSION OF SOME TYPES OF TUNGSTEN
ELECTRODES IN HYPERBARIC ARC WELDING
Yasuo Suga and Hiroo Matsumoto ....................................................................................319

THE EFFECT OF MAGNETIC FIELD ON STABILIZATION OF TIG ARC WELDING
UNDER HYPERBARIC HELIUM ATMOSPHERE
Yasuo Suga .......................................................................................................................325

WELDING UNDER WATER - A METALLURGICAL APPRAISAL
N. Bailey ............................................................................................................................331

UNDERWATER WET WELDING REPAIR OF AN OFFSHORE PLATFORM
ANALYSIS OF FATIGUE SURFACE CRACK GROWTH IN TUBULAR JOINTS USED IN OFFSHORE STRUCTURES
S. Wu and A. Abel ................................................................. 420

FATIGUE PROPERTIES OF Cr-Mn-N-STEELS USED FOR NONMAGNETIC DRILL COLLARS
M. Panzenbock, R. Ebner, and H. Aigner ................................................................. 426

INVESTIGATIONS INTO THE FATIGUE BEHAVIOR OF HOLLOW SECTION (CHS) JOINTS SUBJECTED TO SPECTRUM LOADING
O. Bucak and F. Mang ................................................................. 434

FATIGUE BEHAVIOUR AND DESIGN OF WELDED ALUMINUM STRUCTURES
Risto Kuitunen and Klaus Rahka ................................................................. 442

A FRACTURE MECHANICS BASED FATIGUE LIFE PREDICTION FOR OFFSHORE TUBULAR JOINTS
M. Vormwald ................................................................. 451

FATIGUE ANALYSIS OF T JOINTS IN PLATES
C. Moura Branco and J.A. Ferreira ................................................................. 458

FATIGUE OF HYBRID K-NODES FOR OFFSHORE STRUCTURES MADE OF VACUUM-TREATED FINE GRAINED CAST STEEL
D. Christianus, C.M. Sonsino, and R. Umbach ................................................................. 464

STRESS CONCENTRATION FACTORS FOR SIMPLE TUBULAR JOINTS
P. Smedley and P. Fisher ................................................................. 475

STRESS DISTRIBUTIONS IN SCREWED TUBULAR JOINTS FOR THE PETROLEUM INDUSTRY
T.P. Broadbent and H. Fessler ................................................................. 484

EVALUATION OF RECENT RESEARCH ON THE FATIGUE BEHAVIOUR OF T- AND X-JOINTS MADE WITH SQUARE HOLLOW SECTIONS
A.M. van Wingerde, J. Wardenier, R.S. Puthli, and D. Dutta ................................................................. 492

ADDITIONAL TOPIC
THE EFFECT OF STRESS INTENSITY FACTOR ON THE FRACTURE BEHAVIOUR OF AISI 4340 STEEL
V.K. Tewari, V. Kumar, and K.L. Goyal ................................................................. 508
