Welcome to 10th ISOPE OMS-2013

We greatly appreciate the excellent responses and help we have received from colleagues around the world in the successful organization of the 10th ISOPE Ocean Mining & Gas Hydrates Symposium (ISOPE OMS-2013), Szczecin, Poland, September 22–26, 2013. The symposium features **14 sessions of 53 peer-reviewed papers** and **5** additional oral presentations from **16** countries. This year the symposium continues to introduce gas hydrates in ocean and permafrost in addition to deep-ocean exploration, environment, mining systems, and processing systems.

The 1st (1995) ISOPE Ocean Mining Symposium (ISOPE OMS-95) was held on November 22, 1995 in Tsukuba, Japan as an informal organizational meeting of the **Ocean Mining Working Group (OMWG)**. At the meeting, representatives from 7 countries agreed to establish the group for close international cooperation and continued exchange of the individuals' progress, which could also act as an informal channel between governments. The group concept received the blessing of directors general of the participating governments: U.S., Germany, IOM, Japan, Korea, India, and China (joined later).

The primary objectives of the OMWG are:

- to advance, at an international level, technological progress in the interdisciplinary field of ocean resources, environment and mining and related technologies through international cooperation and participation;
- to disseminate scientific knowledge and provide timely exchange of technical knowledge and information;
- to provide opportunities through its programs for interested individuals to maintain and expand their knowledge in these fields for the benefit of engineering and scientific professions.
- to facilitate opportunities for the members to interact with their governments. The International Society of Offshore and Polar Engineers (ISOPE) facilitates the group activities.

The 2nd OMS-97 Seoul, 3rd OMS-99 Goa, 4th OMS-2001 Szczecin, 5th OMS-2003 Tsukuba, 6th OMS-2005 Changsha, 7th OMS-2007 Lisbon, 8th OMS-2009 Chennai, and 9th OMS-2011 Maui were successfully held.

On behalf of the International Organizing Committee, it is our pleasure to welcome all participants to the ISOPE OMS-2013 Symposium in Szczecin.
