

# First **CALL FOR PAPERS**

## The 29th ISOPE Conference

Honolulu, Hawaii, June 16–21, 2019

### *The 2nd ISOPE Environment Assisted Cracking (EAC) Symposium*

Environment Assisted Cracking (EAC) can lead to unplanned and catastrophic failure resulting in significant consequences for safe operations and downtime to the industry. EAC has become a significant limit for the lifetime of material components in harsh environments in many fields such as oil and gas industry, navy, aerospace, as well as advanced nuclear power plants.

ISOPE-2019 will host The 2<sup>nd</sup> Environment Assisted Cracking (EAC) Symposium to provide a forum to foster the discussion of the critical problems of EAC and recent advances in fundamental understanding, modeling and experimentation. This symposium seeks technical papers related to scientific advancement, modeling and/or experimental studies of various types of EAC, such as sulphide stress cracking, stress corrosion cracking, hydrogen embrittlement, and corrosion fatigue.

Special ISOPE room rate starts from \$199+ per/night at Hilton Hawaiian Village
