Industry Presentation and Interaction

KEY TOPIC: Additive Manufacturing (3D Printing)

John Barnes, ExxonMobil Technical Computing Co, USA

Followed by discussion

Bring Your Input to the Forum!

ADVANCE REGISTRATION IS REQUIRED*

Max 30 Seats: First-come-first-served basis. – **Reservation Deadline: May 28***

The student forum started at ISOPE-2005 Seoul and has been held each year at the Annual ISOPE Conference to promote a more meaningful experience for student attendees. Since then many other meetings have copied the ISOPE Student Forum. Participation in international conferences like ISOPE contributes to your professional development, and the ISOPE leadership wishes to hear from you how our program might have benefitted you or how it might be improved. We hope you will be able to attend this year's forum and share your ideas with us.

This year, in addition to the Student Forum on Thursday, June 20, at 12:00-13:00, we plan to organize the following student events:

- Student Get-Together Corner on Sunday, June 16 19:00-20:00 – No Registration required, just look for the “Student Corner” sign near the ISOPE Registration Desk.
- Student Dinner, Tuesday, June 18, 19:30-22:00 – No Registration required.
Location TBD. The cost of this event is at the expense of the individual student, it is not hosted.

ISOPE Actions Taken in Response to Student Suggestions at Prior Student Forums (2005–2015)

- Journal abstracts and selected papers were posted on the ISOPE web site. All hard-copy ISOPE publications have been digitized and are available to student members (five papers free per year).
- Continuity of Networking
- Student Forum participants received ISOPE pocket calendars (discontinued in 2015.)
- ISOPE office sent **ISOPE** baggage tags to all registered students. (discontinued in 2014.)
- Best student papers in recent ISOPE conferences were uploaded to the website.
- www.isopec.org webpage is annually upgraded including SEO.
- ISOPE converts **journal** manuscripts in either WORD or LaTeX to ISOPE journal template in LaTeX. LaTeX users submit manuscripts in PDF for review, and revised manuscript in either WORD or LaTeX but with PDF file.
- All ISOPE conference and symposium publications are indexed by **EI Compendex, Engineering Index, Fluidex, ISTP/ISI, Google Scholar, Scopus** and more. Journal is further indexed by **SCI-E**.
- All ISOPE-published papers are online available globally from www.onepetro.org (your university library already may be subscribing).

Student Advisors

Prof. Demos Angelides, Aristotle University of Thessaloniki, Greece

Prof. Laurie Boswell, City, University London, United Kingdom

Dr. Stefan Herion, Karlsruhe Institute of Technology, Germany

Prof. Harovel Wheat, University of Texas at Austin, Texas, USA
